Brainstorm & idea prioritization

This brainstorming board is prepared for the Book A Doctor project.
The objective is to identify problems, generate innovative ideas, group related solutions, and prioritize the best features for developing a complete MERN web application.

Date: 04 Aug 2026
Team Id: -NA-
Project Title: Book A Doctor
Total Marks: 4

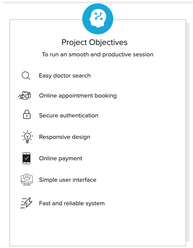
Individual Planning

- [x] Understand the project requirements
- [x] Identify the healthcare problem
- [x] List possible solutions
- [x] Select the best solution
- [x] Prepare the project workflow

1 Define your problem statement

Many patients struggle to find suitable doctors and book appointments efficiently. Traditional appointment methods consume time and often involve long waiting periods.

Book A Doctor is designed to simplify healthcare by allowing
patients to search doctors, book appointments online, make payments securely, and manage appointments through a single platform.



2 Brainstorm

Core Features

- Patient Registration
- Patient Login
- Doctor Search

User Features

- Doctor Profile
- Book Appointment
- Appointment History

Doctor Features

- Online Payment
- Doctor Dashboard
- Patient Dashboard

Admin Features

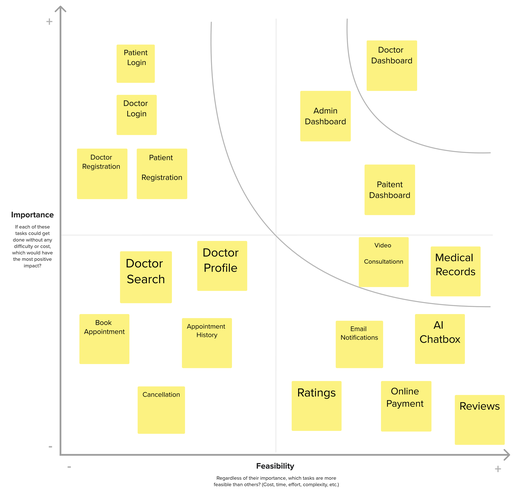
4 Prioritize



Project Summary

The brainstorming session identified the most important
features required for the Book A Doctor system.

The prioritized ideas focus on providing an easy,
secure, and efficient online appointment booking
experience using the MERN stack.

Future enhancements such as AI chatbot, video consultation, and digital medical records
can be added in later versions.
